

LEARNING IN THE DARK

SYNOPSIS OF SIMULATION

How do you cope without your sense of sight?

Navigating from place to place with just your hearing senses and gut feel.

How about money? How do you tell, say, a \$10 note from a \$2 note? And coins? With the difference in sizes between new and old coinage, how do you tell if it's an old \$1 coin or a new \$0.50 coin?

Our Blind guides will show you how to navigate through a world without sight and share with you their life experiences, ways they overcome adversities and their hopes and aspirations with you during the simulation.

OUTCOME

Placing participants in unfamiliar settings or uncomfortable situations heightens their ability to empathise with the visually impaired communities.

After the program, participants will better understand that people with disability are no different from the rest. With dignity and respect, visually impaired individuals can thrive and reach their fullest potential.

PROGRAM FACILITATOR

Aaron is an experienced volunteer and EQ trainer. He had led many youth volunteers to serve marginalised communities regionally.

PROGRAM SCHEDULE

15 min	Engage Briefing
60 min	Experience Simulation
45 min	Facilitated Reflection

(Timing may vary with number of pax)

IDEAL GROUP SIZE

32 & above. 1 group (of not more than 8 pax) will enter simulation space with a Blind facilitator at intervals of 15 mins.

AGE GROUP

7 - Adult

TESTIMONIALS

"I managed to have the privilege to go through the simulation with the help of the visually impaired facilitator in a pitched dark theatre. I trusted someone who has been through that path before, which I felt was essential in simulating something that was real in someone else's life."
